Project Name	Project – Early detection of chronic kidney disease using machine learning
Maximum Marks	2 Marks

Customer Problem Statement Template:

There are some limitations related to the data set used. First,the size of the dataset is considered to be small(400 instances),which may influence the realiability of the results.Second,difficulty finding another data set that has the same features in order to compare the results of the data sets.Missing data is a very common issue, especially in the medicak area. Usually,every patient record and every attribute contains some missing values

Problem Statement (PS)	Iam (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	patient	Cure CKD	It is not possible in the cases	It can't be applicable for the elder people	disappointed
PS-2	Medical executive	Treat CKD	It is not possible in the cases	It's found to be risk due to missing values	disappointed
